Rural Extension with Africa's Poor

A Christian approach to development through teaching

REAP's
Natural Medicines Story

REAP brings healing to the home…

artemisia cures malaria

chilli ointment helps rheumatics

REAP and **ANAMED** (**A**ction for **NA**tural **MED**icines) seek to combine modern scientific knowledge with traditional practices to use the best of both worlds

Scientific understanding provides information on dosages, limitations and side effects, whereas locally grown plants offer easy access at little cost

The negative aspects of mass produced pharmacetical products and tribal customs are covercome by providing knowledge free from both commercial exploitation and manipulative purposes

black stones remove bites and stings

aloe vera gives fast relief from burns

pawpaw treats wounds and intestinal worms
